PERSONAL PROFILE

I am a practical person who values common sense and pragmatic solutions. From a young age, I have been driven by a strong sense of curiosity and a love of learning. I believe that attention to detail and precision are key to the success.

I have a strong passion for programming, which led me to successfully complete the Alpha Program at Telerik Academy. There, I built a solid foundation in software development and database management.

With over 12 years of professional experience as an architect, I have developed strong discipline, time management and team player skills.
